

EFU-Phosphorus Academic & Standard Use Licence

(EFU-P-ASUL v1.0 – Revised)

Applies to: EFU-Phosphorus Standard v1.0 and subsequent minor revisions

Author: István Simor

Steward: Nookratic Bloc

Year: 2026

Version: 1.0-rev-2025-12-31

Base licence: EFU Universal Licence v1.0 (CC BY 4.0 compatible)

1. Grant of rights

This licence grants open, worldwide, royalty-free permission to:

- use, reproduce and distribute the EFU-Phosphorus Standard (EFU-P);
- apply EFU-P in academic research, education, policy analysis, environmental management, agriculture and wastewater studies;
- include EFU-P in peer-reviewed publications, reports, theses, datasets and decision-support tools;

provided that proper attribution is given (Section 2) and the core definition is preserved (Section 3).

Translation clause. The text of this licence may be translated into other languages, provided that any translation is made available under the same terms and clearly indicates that the English version is the reference text in case of divergence.

2. Attribution requirement

Any use of EFU-P must include attribution in the following form (or an equivalent scholarly citation):

Simor, I. (2026). *EFU-Phosphorus Standard v1.0*. EFU Universal Licence (CC BY 4.0).

Attribution may be placed in any reasonable manner (footnote, bibliography, metadata, software “About” page, etc.) and must not imply endorsement by the author or the steward organization.

3. Core definition protection (non-negotiable)

The EFU-Phosphorus reference definition is fixed under this licence:

1 EFU P = 0.55 kg elemental phosphorus (P) per year per person,

defined as the average adult human phosphorus excretion rate. defined as the average adult human phosphorus excretion rate.

Permitted actions:

- scaling EFU-P to any system (farms, rivers, nations, industries);
- conversions from phosphorus compounds (P_2O_5 , PO_4^{3-} , etc.) after conversion to elemental P;
- integration with EFU-N, EFU-C, EFU-W and other EFU standards.

Prohibited without explicit renaming:

- redefining EFU-P with a different baseline;
- using P_2O_5 -based values without prior conversion to elemental P;
- using the term “EFU-P” to denote a metric that is not human-referenced.

Labelling requirement for deviations. Any modification of the core definition must be explicitly labeled, for example:

“Modified EFU-P (regional baseline = $0.62 \text{ kg P yr}^{-1} \text{ person}^{-1}$)”.

Such variants must not be presented as the EFU-Phosphorus Standard.

4. Extensions, models and derivative works

Derivative works are explicitly allowed, including but not limited to:

- regional EFU-P baselines and parameter sets;
- sector-specific EFU-P modules (agriculture, mining, wastewater, food systems);
- legacy phosphorus models and long-term soil/sediment dynamics;
- coupling with nitrogen, carbon and water EFU standards.

All derivative works must:

- clearly distinguish the original EFU-P definitions from local extensions or modifications;
- cite the EFU-Phosphorus Standard v1.0 as the reference baseline in methods, documentation or footnotes.

Derivative works may be released under additional or more specific terms, provided that the original EFU-P material remains available under EFU-P-ASUL v1.0 (and its CC BY 4.0-compatible base licence).

5. Non-endorsement clause

Use of EFU-P under this licence does not imply endorsement by:

- István Simor;
- the Nookratic Bloc;
- any affiliated contributors.

No endorsement claim may be made without explicit written permission from the author or steward. This clause applies to all public communications, marketing materials, policy recommendations and similar contexts.

6. Commercial and regulatory use

This licence permits:

- inclusion of EFU-P in government reports and regulatory impact assessments;
- use in support of environmental regulation and nutrient-management policies;
- use in consultancy studies, commercial research and analysis, as part of reports, tools or services.

This licence does not automatically grant:

- trademark-like control over the term “EFU-P”;
- exclusive certification schemes based on EFU-P;
- rebranding EFU-P as a closed or pay-walled metric.

Such uses require a separate written agreement with the steward organization.

Trademark disclaimer. This licence does not confer any right to use “EFU-P” as a trademark or service mark, except as required for attribution and factual description.

7. Relationship to CC BY 4.0

This licence is fully compatible with the **Creative Commons Attribution 4.0 International (CC BY 4.0)** licence and inherits its freedoms and obligations. It adds domain-specific safeguards regarding:

- protection of the core EFU-P definition;
- unit consistency (elemental phosphorus, human-referenced baseline);
- prevention of silent or misleading redefinition of the EFU-P unit.

In case of ambiguity, this licence governs the use of the EFU-P term and definition, while CC BY 4.0 governs general copyright, attribution and reuse.

8. Governing principle

EFU-P is intended as a **scientific measurement standard**, not as proprietary intellectual property. This licence exists to ensure that EFU-P:

- remains comparable across studies, sectors and jurisdictions;
 - stays human-referenced and intuitively interpretable;
 - can function as a shared, open language for phosphorus sustainability and planetary stewardship.
-

9. Disclaimer of warranty and liability

The licensor provides the EFU-Phosphorus Standard “as is”, without any warranties of any kind, either express or implied, including, without limitation, warranties of merchantability, fitness for a particular purpose or non-infringement. To the maximum extent permitted by applicable law, the licensor shall not be liable for any direct, indirect, incidental, consequential, special or exemplary damages arising out of or in connection with the use of the standard.

10. Termination

If a licensee materially breaches the attribution requirement (Section 2) or the core-definition protection clause (Section 3), this licence terminates automatically for that licensee. Rights may be reinstated if the breach is cured within thirty (30) days of receiving written notice of the violation, in line with the restoration principles of CC BY 4.0.

11. Governing law

This licence shall be governed by and construed in accordance with the laws of Switzerland, without regard to its conflict-of-law principles.

12. Contact and permission requests
